Facts about the Berlin W.H.O. Workshop

Febr. 21-23.1996

Subject: MCS or IEI ?

Prof. vet. "\$ -Link" >>>>

Prof. vet. "Adolf Dollar" (see left corner of the above picture) (real name is Lingk and stands for link to the Chemical Industry , who is the actual boss of the BGVV), who was awarded the title of a "poison expert" , and who is quoted gladly by industrial circles and the Agricultural Chemistry, to which he is very much obligated, declared in the old "Reichshauptstadt Berlin" recently - *in a setting of a selected group of mainly + proven experts of ethnic Germans* (with only a few foreign trimmings) - there is not such a thing as MCS with humans, because such kind of illness was never detected nor seen by the agency. Such "defeatistic characteristics" (*towards the positive national chemistry-consciousness*) has at most been observed by his agency with animals after pyrethroid-exposure, whereby these "inferior creatures" have found their well deserved death most of the time. But animal tests can not be applied to "German people". Besides, he believes, that such "vulnerable animals" are of " foreign origin" and as such they belong to a "race of inferior quality". As a result, every chemical illness, invented by obscure characters, would collaps in itself; this can already be observed from the "Anglo-American" description for this " vulnerable human race" and besides, this was already recognized in the thirties (even the IEI-epidemic of "the vulnerable" was said to be created and approved temporarily, to calm down excited members of the European Community, which in the end is just as unbearable and must be burried after 3 years the latest). SEVESO- or Vietnam- illnesses have also been nothing more but "Soviet- conspiracies", and on top of all this was refuted by Gorbatschow.
